FOR IMMEDIATE RELEASE

MEKCO Group has Entered into a Strategic Partnership with Donica, Inc.

Miami, FL, June 26, 2018 -- MEKCO Group is pleased to announce the company has entered into a strategic partnership with Donica, Inc. as their dealer and authorized repair facility for In-Flight Entertainment & Connectivity (IFEC) equipment sales & repairs.

The partnership allows MEKCO to provide repair management, installations and distribution of Donica's product line including "plug & play" products (DMR, PRAM, QACVR) which are a replacement solution for legacy aircraft. These products increase output quality, storage of memory, potentially lower maintenance costs, lighter weight and longer in-service time.

"This agreement is a crucial step forward for our team. It allows us to simply insert new equipment without a costly aircraft modification for our customers. We always try and provide our customers affordable, scalable, and up to date products which they will enjoy, and provide low-cost carriers some leveling with major airlines, " said Bill Utset, President & CEO of MEKCO Group.

MEKCO Group's current capabilities will expand with this partnership to include installation and repair of W6000, and Smart LCD units. Additionally, MEKCO performs IFE & IFEC repairs, in-cabin electronics & electromechanical repairs as well as in-cabin interiors repair such as plastics, composites and panel adjustments.

MEKCO Group, Inc., a Miami, Florida based company was established in 2008 as an FAA & EASA repair facility, which specializes in the maintenance, repair & overhaul of in-flight entertainment & connectivity, cabin and galley equipment. The company is a leading cabin solutions provider to the global market offering cabin maintenance and installation for WiFi, IFEC, Electronics, and Electro Mechanical solutions. In addition to cabin solutions, MEKCO provides exterior lighting solutions, parts inventory for purchase and exchange. For more information visit www.mekcogroup.com or call 305.592.8807.
