**AvFab Receives Indian Approval For Installation Of Armledge/Table Kit In
King Air C90 Series Aircraft**

Clinton, MO – October 16, 2014 – Aviation Fabricators (AvFab) recently announced they have received STC approval on their Armledge/Table System for the C90 King Air series aircraft.

The armledge/table system is designed to combine style with functionality and update the aircraft to the same look and feel as the newer models of King Airs. The new sidewall with integrated outboard armrest modernizes the look of the cabin and allows more usable room on the seat surface. The table features new built-in cup holders, which replace the old style “flip out” holders.

“We are proud to be able to offer STC approved King Air solutions to operators around the world,” said AvFab’s GR Lowe. “The armledge/table system kit will not only modernize the look of the cabin but add value as well, and this latest STC means even more operators can now take advantage of the benefits the kits have to offer.”

The armledge/table kit includes two tables, sidewall, armledge, brackets, hardware, complete installation instructions, and STC. Other products are available through Aviation Fabricators to further enhance the cabin, such as lateral tracking seat bases and integrated headrests.

AvFab provides inspection, repair and overhaul of corporate aircraft interior components, and is also an FAA-PMA producer of custom aircraft seating, parts and components. AvFab’s sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 90,000 sq. ft. of OEM seats and cabin components. Together they represent a “one-source” solution to any corporate aircraft interior need. For more information on this or any other product or service offered by AvFab, please visit their websites at www.kingairupdates.com and www.avfab.com or call 660-885-8317.
