**EFA (English Field Aviation) Offers Complimentary Detailing Package For  
King Air Customers**

*Detail package valued at \$3,000*

**Amarillo, TX, May 27, 2015** – In order to further achieve their company mission to exceed the customer’s expectations and provide the most professional service possible, EFA (English Field Aviation) is offering their extensive aircraft detailing package to customers at no charge. Any King Air customer who has a phase inspection completed at either of the EFA locations is eligible for the complimentary detail package.

The package is made up of multiple detailing and finishing services including a full machine buff and wax, wheel well cleaning, De-Ice Boots treatment, bright work polish and full interior detail.

“Some shops simply wipe down the interior and exterior of the aircraft before delivery,” said Travis Lamance, Co-Owner & General Manager, EFA. “Our detailing package is far more in-depth and valuable to customers.”

The machine buff/wax deep cleans and polishes heavily contaminated surfaces and removes heavy oxidation, carbon buildup, oil, and fuel stains in order to restore paint to “like new” condition and provide a layer of protection against dulling, fading and debris buildup. The De-Ice Boot treatment cleans and restores the boots to proper condition, ensuring the safe operation of the aircraft and providing a protective layer between the boots and external elements. Bright work polish offers complete cleaning and polish of all bare metal surfaces; spinners, leading edges, engine intakes, etc., which are all machine buffed to a mirror finish. The complete interior detail includes a deep cleaning of all interior surfaces, interior vacuum and wipe down, leather and vinyl conditioning and minor stain removal.

“While our detailing package does require a large commitment of time and resources, we believe it’s important to provide value-added services and benefits to customers in order to exceed their expectations and ensure they are fully satisfied with their experience at EFA,” concluded Mr. Lamance.

(more)

The time and resources needed to complete the detailing package varies based on the type of King Air being serviced, but the package has been valued at \$3,000. EFA has a variety of additional detailing and finishing options that can be purchased individually or added to the detail package. EFA is a Jet Stream dealer and utilizes a variety of Jet Stream products in their detailing process. To learn more call 1-806-322-1971.
