FOR IMMEDIATE RELEASE

AvFab Receives Nigerian Approval On Econo & Traveler Airline Seat

Clinton, MO – May 28, 2015 – Aviation Fabricators (AvFab) recently received Nigerian approval for the installation of their Supplemental Type Certificate (STC) approved King Air Econo and Traveler Airline Seats in Beechcraft King Air 200, 300, B300 and B350 series aircraft.

These value-oriented Airline Style Seating options were designed for high density applications, and are available in two models, Econo Seat and Traveler Seat. Both also have FAA, EASA, Mexico, Russia, and Transport Canada STC approval.

The Econo Seat was the first to be engineered for durability and affordability. Weighing approximately 23 lbs., it's a lightweight "no maintenance" solution for those wanting to add capacity without adding unnecessary cost. The Traveler Seat builds on the quality and durability of the Econo while adding some additional features including more legroom, easier entry and exit, and improved comfort.

All airline style seating includes seat belts, back and bottom cushions (un-upholstered), life vest, and installation instructions. Add-on options include aisle-side arm rest, headrest, and side wall/arm ledge panel for outboard armrest. The seats come with a one-year warranty.

Installation is as simple as removing the existing seats/furnishings, and then placing the high-density seats into the desired locations by locking them into the seat tracks. AvFab also offers pricing quotes on the removed seats as potential trade-ins.

AvFab provides inspection, repair and overhaul of corporate and Special Mission aircraft interior parts and components, and is also an FAA-PMA producer of custom aircraft seating, parts and components. AvFab's sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 90,000 sq. ft. of OEM seats and cabin components. Together they represent a "one-source" solution to any corporate aircraft interior need. For more information on this or any other product or service offered by AvFab, please visit their websites at www.kingairupdates.com and www.avfab.com or call 660-885-8317.
