Shadin Avionics Introduces AIS-370 Ethernet Data Converter

September 30, 2015 - Shadin Avionics

Shadin Avionics announced the release of the AIS-370, a new Ethernet based digital data converter platform. The AIS-370 is capable of converting Ethernet, digital, serial, analog and discrete inputs and outputs using common avionic protocols including ARINC 429.

“Shadin’s unique AIS platforms enable quick turn, cost effective data conversion products that are certified and flight worthy” commented Dan Nelson, CEO of Shadin Avionics. “The AIS-370 now adds Ethernet capability to our growing list of technologies supporting the increasing demand for new avionics systems.”

The AIS-370 Ethernet is part of a growing family of certified and flight worthy data converters that include the AIS-360 Digital platform, AIS-460 MIL-STD-1553 platform, AIS-450 Digital/Synchro platform, AIS-380 Analog/Digital platform, AIS-800 Engine platform and the AIS-100 USB QAR platform.

About Shadin Avionics

Shadin is an acknowledged industry leader in providing world class data collection and data conversion products for all types of aircraft. Shadin Avionics specializes in the design, manufacture, support and distribution of Avionics Interface Systems (AIS), Fuel Flow Systems, Engine Trend Monitoring (ETM), Altitude Management Systems, Air Data Computers (ADC) and other instrumentation for turbine, piston and rotor aircraft for the military, general and corporate aviation markets. For more information, please visit www.shadin.com.
